Experience

lasimarl.com.tn
Mediation and Arbitration platform
July 2023 - Present (2 years)

a Mediation and Arbitration platform by videoconference allowing all stages of the process to be handled in a completely digital manner, with the aim of finding a rapid solution in resolving their disputes

https://emnassistance.tn
Platform for medical assistance
May 2021 - Present (4 years 2 months)
Sousse, Tunisia

This application is designed to manage a company specializing in 24/7 medical assistance across Tunisia. With a multidisciplinary medical team proficient in the latest technologies, it ensures seamless coordination of services, including patient transfer and accommodation. From arrival to return, every step is optimized to provide efficient and tailored medical care. This digital solution aims to enhance healthcare accessibility and quality while ensuring smooth management of medical interventions.

Ecole Privée
School Manager Platform
June 2020 - June 2024 (4 years 1 month)
Sfax, Tunisia

The platform is designed to facilitate school management and student monitoring. It organizes administrative information, timetables, academic results, and communication between teachers, students, and parents. With intuitive digital tools, it optimizes the management of educational resources and improves academic monitoring. Ideal for schools, this solution promotes better coordination and structured learning.

https://cas.tn
Platform for project management and monitoring of entrepreneurs/ companies
March 2009 - October 2015 (6 years 8 months)
Sfax, Tunisia

A platform designed to facilitate project management and contractor tracking. It offers tools to plan, organize, and track project progress in real time. Advanced features allow users to manage resources, track performance, communicate effectively, and optimize their workflow. Ideal for businesses and startups, this digital solution improves coordination and productivity while ensuring structured and transparent tracking.

https://www.ccis.org.tn/
Office registry, facilitating the tracking of incoming and outgoing correspondence
January 2008 - July 2011 (3 years 7 months)
Sfax, Tunisia

This web platform is designed to efficiently manage an office registry, facilitating the tracking of incoming and outgoing correspondence. It enables real-time recording, classification, and monitoring of each document, ensuring smooth and secure administrative exchanges. With advanced digital tools, it optimizes organization, enhances productivity, and ensures greater transparency in correspondence processing. Ideal for administrations and businesses, it centralizes information and automates document management processes.
